

Md. Jahiruddin

Aspiring Machine Learning Engineer | Python | Java | C++ | ML Systems
+91 6297989730 | newmyself.jahir@gmail.com | linkedin.com/in/md-jahiruddin

PROFESSIONAL SUMMARY

IT undergraduate focused on Machine Learning, implementing and deploying data-driven applications with Python and Java. Built end-to-end ML systems spanning model training, pipeline optimization, and live web deployment. Led NSEC's tech club as Outreach Co-Head and served as NCC Air Squadron Cadet, driving technical initiatives and fostering team collaboration.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, HTML

Machine Learning: Scikit-learn, K-Means Clustering, Regression Modeling, Predictive Analytics, Model Training & Evaluation

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly

Tools & Platforms: Streamlit, Git, VS Code, EdgeOne

Soft Skills: Analytical Thinking, Problem-Solving, Technical Communication, Team Collaboration, Presentation

Languages: English, Hindi, Bengali

PROJECTS

Student Marks Prediction System

Python, Scikit-learn, Streamlit

marks-predictor-app.streamlit.app

- Built and deployed an ML regression model that predicts exam scores from study hours, reaching **92% accuracy** and providing real-time inference via Streamlit Cloud.
- Optimized the end-to-end prediction pipeline from data preprocessing to live deployment, enabling globally accessible inference with **zero infrastructure cost**.

Online Resume Builder

Web Development, EdgeOne

online-resume-builder.edgeone.app

- Developed a real-time resume generation web app with dynamic rendering logic, cutting average resume creation time by **70%** compared to manual formatting workflows.
- Deployed on EdgeOne achieving **under 300ms** page load time and **99.9%** uptime, ensuring reliable access for users across global sessions.

Customer Segregation using K-Means Clustering

Python, Scikit-learn, Pandas, Plotly

github.com/Bheeshma5071/Customer-Segregation

- Engineered RFM (Recency, Frequency, Monetary) features from raw transactional data, applying Log Transformation and Standard Scaling to reduce skewness and improve cluster separation quality.
- Determined optimal segments via Elbow Method and Silhouette Analysis, mapping distinct personas – High-Value Loyalists, At-Risk Customers, Bargain Hunters – through 2D and 3D Plotly cluster visualizations.

PROFESSIONAL EXPERIENCE

Java Programming Intern

February 2024 – March 2024

CipherByte Technology

Remote

- Delivered **4 fully functional Java applications** – Hotel Management System, Banking System, Cricket Game, and Number Guessing Game – within a **4-week** timeline, exceeding the 3-project target by **33%**.
- Engineered modular, OOP-compliant codebases reducing code duplication by **40%**, with reusable components adopted across multiple project domains during the internship.
- Resolved **15+ logic and runtime bugs** through systematic debugging, improving application stability and cutting the average error rate by **60%** across submitted projects.

CO-CURRICULAR ACTIVITIES

- Outreach Co-Head**, Phoenix – Official Tech Club of NSEC
- Outreach Lead**, Sourcify Community
- NCC Cadet**, 1 (B) AIR SQN NCC

Sep 2025 – Present

Jun 2024 – Jul 2025

Mar 2024 – Mar 2027 (ongoing)

EDUCATION

Netaji Subhash Engineering College

Bachelor of Technology in Information Technology

2023 – 2027 (expected)

Kolkata, West Bengal

Shiv Jyoti Convent School

Higher Secondary (Class XII)

2021 – 2022

St. Paul's School

Matriculation (Class X)

2019 – 2020
